RETRACTABLE POLY FINGERS

STRONG & RESILIENT

The Poly Retractable Fingers will not fray with heavy usage. These fingers are flexible and will bend past the breaking point of metal fingers.

NO HARM TO YOUR COMBINE

Bent metal fingers can gouge and poke through the auger. Broken metal fingers can do costly damage to the drum and thresher system. The advantage poly fingers have over metal is when they eventually break, the poly will disintegrate as it passes through the combine and will not damage the internal working parts like rotors and cylinders.

These Poly Retractable Fingers OUT-PERFORM metal on multiple levels!

POLY PICKUP BANDS

These poly bands are made heavy to eliminate the problem of bending and wearing and will withstand impacts without damage. If pickup teeth do rub against the bands, they will not wear through nearly as quickly as with steel bands. In addition, hay feeds through much more smoothly and easily. The ½ inch thick bands have a 1/4 inch support ring on the inside to strengthen and maintain shape.
Longer bolts (included) are required to attach the poly bands.
